

Allen Bradley 0041-5056 Shaft Seal Kit, for H-2000 Frame Servo Motor

Basic Information

- Place of Origin: Germany
- Brand Name: Allen Bradley
- Certification: CE
- Model Number: 1794-
- Minimum Order Quantity: 1
- Price: USD
- Packaging Details: 15,10 x 15,40 x 4,60
- Delivery Time: 10-12Days
- Payment Terms: L/C, T/T
- Supply Ability: 100

Product Specification

- Processor: Intel Celeron M 1 GHz
- Communication Ports: Ethernet, USB, RS-232, RS-485
- Display Size: 7 Inch, 10 Inch, 12 Inch, 15 Inch, 19 Inch
- Resolution: 800 X 480 Pixels
- Weight: Varies Depending On Display Size
- Display Type: TFT Color
- Input Voltage: 18-32V DC
- Power Consumption: Max 50W
- Touch Screen: Analog Resistive
- Memory: 512 MB RAM, 512 MB Nonvolatile Memory
- Operating Temperature: 0-55°C
- Dimensions: Varies Depending On Display Size
- Operating System: Windows CE 6.0
- Certifications: UL, CUL, CE, C-Tick, KCC

Product Description

Allen Bradley 0041-5056 Shaft Seal Kit, for H-2000 Frame Servo Motor

Okay, let's take a closer look at the Allen-Bradley 0041-5056 Shaft Seal Kit for the H-2000 frame servo motor:

1. Product Name:

- Allen-Bradley 0041-5056 Shaft Seal Kit

2. Description:

- The 0041-5056 is a replacement shaft seal kit designed for the Allen-Bradley H-2000 frame servo motor.
 - The shaft seal kit is used to maintain the integrity of the servo motor's internal components by preventing the ingress of contaminants and preserving the correct lubrication.

3. Compatibility:

- This shaft seal kit is specifically designed for use with the Allen-Bradley H-2000 frame servo motor.
 - It is not compatible with other servo motor models or frame sizes.

4. Key Features:

- Provides a complete set of replacement shaft seals for the H-2000 frame servo motor
 - Helps maintain the motor's performance and extend its service life
 - Ensures the proper sealing and protection of the motor's internal components

5. Applications:

- The 0041-5056 shaft seal kit is primarily used for maintaining and servicing Allen-Bradley H-2000 frame servo motors in industrial automation and motion control applications.

6. Recommended Use:

- The shaft seal kit should be installed by a qualified technician or service personnel, following the manufacturer's recommended procedures and safety guidelines.
 - Regular inspection and timely replacement of the shaft seals can help prevent potential motor failures and ensure the continued reliable operation of the servo motor.

7. Availability and Support:

- As an Allen-Bradley product, the 0041-5056 shaft seal kit is available through authorized Allen-Bradley distributors and service centers.
 - Technical support and documentation for the installation and maintenance of this kit can be obtained from Rockwell Automation or its authorized partners.

In summary, the Allen-Bradley 0041-5056 Shaft Seal Kit is a replacement part designed specifically for maintaining the integrity and performance of the H-2000 frame servo motor. Its proper installation and timely replacement can help extend the service life of the servo motor and ensure reliable operation in industrial automation and motion control applications.
