SIEMENS 6ES7972-0BB52-0XA0 MBIT/S 90° CABLE OUTLET, INSULATION DISPLACEMENT METHOD FASTCONNECT, WITH PG RECEPTACLE

The Siemens 6ES7972-0BB52-0XA0 is a PROFIBUS DP (Decentralized Peripherals) cable with a 90° cable outlet and insulation displacement method FastConnect. It also features a PG receptacle. Here's some information about this product:
1. Manufacturer: Siemens
2. Model: 6ES7972-0BB52-0XA0
3. Cable Type: This is a PROFIBUS DP cable, which is commonly used for communication between industrial devices and controllers in automation systems.
4. Cable Outlet: The cable has a 90° cable outlet, which means it is designed to make a right angle bend at the connector end. This can be useful for installations where space is limited or to ensure proper cable routing.
5. Insulation Displacement Method: The cable utilizes the insulation displacement method for termination. This method allows for easy and reliable connection by displacing the insulation of the wires to establish electrical contact.
6. FastConnect: The cable features the FastConnect system, which is Siemens' proprietary technology for quick and tool-free assembly of PROFIBUS cables. This simplifies the installation process and reduces setup time.
7. PG Receptacle: The cable is equipped with a PG (Panzer-Gewinde) receptacle. PG threads are commonly used in industrial applications for cable glands and connectors, providing a secure and reliable connection.
For detailed specifications, technical data, and compatibility information specific to the Siemens 6ES7972-0BB52-0XA0 PROFIBUS DP cable, it is best to refer to the official documentation provided by Siemens or contact their technical support. They will be able to provide you with accurate and up-to-date information based on your specific requirements and the latest product information available.
