

Siemens 6ES7952-1KL00-0AA0 SIMATIC S7 MC952 Memory Card, Long, Flash EPROM, 2MB memory card for S7-400, long design, 5V

Basic Information

- Place of Origin: Germany
- Brand Name: SIEMENS
- Certification: CE
- Model Number: 6ES7952-1KL00-0AA0
- Minimum Order Quantity: 1
- Price: USD
- Packaging Details: 9,10 x 13,00 x 1,50 CM
- Delivery Time: 10-12Days
- Payment Terms: L/C, T/T
- Supply Ability: 100PS

Product Specification

- Program Capacity: 2 Mbyte
- Software Compatibility: SIMATIC STEP 7, TIA Portal
- Cpu Type: Central Processing Unit
- Mounting: Rack-mounted
- Memory Capacity: 2 Mbyte
- Product Type: Programmable Logic Controller
- Weight: 0,045 Kg
- Protection Class: IP20
- Programming: STEP 7
- Communication Interface: Ethernet, Profibus, MPI, RS232, RS485
- Data Memory: 2 Mbyte
- Number Of Communication Interfaces: Up To 8
- Number Of Digital Outputs: Up To 4096
- Storage Temperature: -40 To +85°C

Product Description

SIEMENS 6ES7952-1KL00-0AA0 SIMATIC S7 MC952 MEMORY CARD, LONG, FLASH EPROM, 2MB MEMORY CARD FOR S7-400, LONG DESIGN, 5V

Product Description:

The Siemens 6ES7952-1KL00-0AA0 is a SIMATIC S7 MC952 memory card designed for use with Siemens SIMATIC S7-400 programmable logic controllers (PLCs). This specific model features a long design and has a capacity of 2MB. The memory card is designed as a 5V Flash EPROM memory card, providing non-volatile memory storage for program code, data, and variables in the S7-400 PLC system. It allows for permanent storage of information and retains data even when power is disconnected.

Product Specifications:

- Model: 6ES7952-1KL00-0AA0
- Memory Card Type: 5V Flash EPROM memory card
- Memory Capacity: 2MB

Product Applications:

The 6ES7952-1KL00-0AA0 Flash EPROM memory card has various applications in Siemens SIMATIC S7-400 PLC systems, including:

1. Program Storage: The Flash EPROM memory card provides non-volatile storage for program code, allowing for permanent storage of the PLC program. It retains the program even during power loss and ensures that the program can be loaded upon system startup.
2. Data Storage: The Flash EPROM memory card can also be used for storing data and variables that need to be retained even when the system is powered off. This enables the preservation of critical data and parameters.
3. Firmware Updates: The Flash EPROM memory card can be utilized for firmware updates of the S7-400 PLC. It allows for easy and convenient installation of new firmware versions, enabling system enhancements and bug fixes.
4. Backup and Recovery: The Flash EPROM memory card can serve as a backup storage medium for critical program and data. In the event of a PLC failure or system crash, the backup can be used to restore the system to its previous state quickly.

Please note that the 6ES7952-1KL00-0AA0 Flash EPROM memory card is specifically designed for the S7-400 PLC series and may not be compatible with other Siemens PLC models. For detailed information on usage, installation, and compatibility, it is recommended to refer to the Siemens product documentation and consult their technical support for further assistance.
