

SIEMENS 6DD1606-1AD0 SIMADYN D PROCESS MODULE PT20M, 16-BIT 20MHZ WITH COUPLING MEMORY 64KB FOR L-BUS

Basic Information

- Place of Origin: Germany
- Brand Name: SIEMENS
- Certification: CE
- Model Number: 6DD1606-1AD0
- Minimum Order Quantity: 1
- Price: USD
- Packaging Details: 27,50 x 27,50 x 4,20CM
- Delivery Time: 10-12Days
- Payment Terms: L/C, T/T
- Supply Ability: 100PS

Product Specification

- Memory: 16GB
- Connectivity: Ethernet, USB, RS232
- Integrated Web Server: Yes
- Product Version: V1.0
- Model: TDC
- Integrated Functions: PLC, Motion Control, HMI, Safety, Etc.
- Environmental Conditions: 0-55°C, 5-95% Humidity
- Memory Capacity: 64 KB
- Touchscreen: Yes
- Interfaces: USB, Ethernet, RS485
- Communication Protocols: PROFIBUS, PROFINET, Modbus TCP
- Communication Interface: Ethernet, PROFIBUS, Modbus
- Power Supply: AC 100-240V
- Plm Effective Date: 2017
- Weight: 5kg

Product Description

SIEMENS 6DD1606-1AD0 SIMADYN D PROCESS MODULE PT20M, 16-BIT 20MHZ WITH COUPLING MEMORY 64KB FOR L-BUS

The Siemens 6DD1606-1AD0 SIMADYN D Processor Module PT20M is an enhanced version of the PT20 processor module, designed for the SIMADYN D control system. The key difference is the addition of a coupling memory, which provides increased functionality and integration capabilities.

Here are the key details about the SIMADYN D Processor Module PT20M:

1. Product Overview:

- The PT20M is a 16-bit, 20 MHz processor module for the SIMADYN D control system.
- It builds upon the capabilities of the standard PT20 module by adding a coupling memory feature.

2. Key Features:

- 16-bit, 20 MHz processor
- 64 KB coupling memory for increased integration and data exchange
- Retains the core I/O capabilities of the PT20 module:
- 16 bidirectional digital I/O (BI AL)
- 8 bidirectional digital I/O (BI)
- 16 digital outputs (BO)
- 7 analog inputs (AE)
- 4 analog outputs (AO)
- L-bus communication interface

3. Technical Specifications:

- Processor: 16-bit, 20 MHz microprocessor
- Memory:
- 512 KB Flash
- 256 KB RAM
- 64 KB coupling memory
- Digital I/O:
- 16 bidirectional digital I/O (BI AL)
- 8 bidirectional digital I/O (BI)
- 16 digital outputs (BO)
- Analog I/O:
- 7 analog inputs (AE)
- 4 analog outputs (AO)
- Communication Interface:
- L-bus
- Dimensions (W x H x D): Compact design for space-saving installation
- Mounting: DIN rail mounting

4. Functionality and Applications:

- The PT20M processor module is designed to provide enhanced integration and data exchange capabilities within the SIMADYN D system.
- The 64 KB coupling memory allows for increased data exchange and integration with other SIMADYN D components, such as:
- I/O modules
- User interfaces
- Other control devices
- This makes the PT20M well-suited for applications that require tighter integration, data sharing, and coordinated control, such as:
- Complex industrial automation systems
- Integrated motion control
- Process control and monitoring
- Building automation
- Other applications that benefit from increased data exchange and integration

5. Integration and Configuration:

- The PT20M processor module is designed to be seamlessly integrated into the SIMADYN D control system.
- It connects to the L-bus communication interface, allowing it to communicate with other SIMADYN D components.
- Configuration and programming of the PT20M module is typically done using the SIMADYN D engineering software, which provides a comprehensive interface for system configuration, programming, and diagnostics.

6. Advantages:

- 16-bit, 20 MHz processor with balanced performance
- Versatile I/O capabilities
- 64 KB coupling memory for enhanced integration and data exchange
- L-bus communication interface for integration into the SIMADYN D system
- Compact design for space-saving installation
- Suitable for applications requiring tighter integration and data sharing

7. Certifications and Approvals:

- The Siemens 6DD1606-1AD0 SIMADYN D Processor Module PT20M is designed to meet relevant safety and quality standards for industrial applications.
- Additional certifications may be available based on specific regional or application requirements.

Please let me know if you need any further details on this enhanced SIMADYN D processor module from Siemens.

Product	
Article Number	6DD1606-1AD0
Product Description	*** SPARE PART*** SIMADYN D PROCESS MODULE PT20M TECHNOLOGY 16 BIT, 20MHZ WITH COUPLING MEMORY 64KB FOR L-BUS
Product family	Not available
Product Lifecycle (PLM)	PM500:Discontinued Product or end of PLM & Support
PLM Effective Date	End of product lifecycle since: 01.10.2016
Notes	Product was deleted without replacement. If you need assistance please contact our local Siemens office
Price data
